

Service Bulletin #190

December 13, 2017

Ghostbusters, Aerosmith, Batman, Star Wars (All Models)

Capacitor Service Kit 502-7060-00

Notice: The latest models will already have a capacitor installed on nodes 8 and 9. Service is only necessary if your game is missing a capacitor on either node board.

For Games:

- Ghostbusters (all models)
- Aerosmith (all models)
- Batman (all models)
- Star Wars (all models)

Symptom:

False switch activations during gameplay.

Problem:

Electrical noise on the 48v power source.

Solution:

Install the Capacitor Service Kit 502-7060-00.

US customers should contact Stern Pinball, Inc. at 800-542-5377 or Parts.Service@sternpinball.com

All customers outside of the US should contact their distributor.

Procedure:

1. Make sure the game is turned off/game unplugged. Locate and unplug the 5-pin power connector CN6 on core nodes 8 and 9.

2. Plug the female end of the Capacitor Kit into the 5-pin power connector CN6 on core nodes 8 and 9.

3. Plug the male end of the Capacitor Kit into the 5-pin power harness connector that was unplugged in Step 1.

Ex: Capacitor Kit installed on Node 8
