Capacitor Service Kit 502-7060-00

Notice: The latest models will already have a capacitor installed on nodes 8 and 9. Service is only necessary if your game is missing a capacitor on either node board.

For Games:
- Ghostbusters (all models)
- Aerosmith (all models)
- Batman (all models)
- Star Wars (all models)

Symptom:
False switch activations during gameplay.

Problem:
Electrical noise on the 48v power source.

Solution:
Install the Capacitor Service Kit 502-7060-00.
US customers should contact Stern Pinball, Inc. at 800-542-5377 or Parts.Service@sternpinball.com
All customers outside of the US should contact their distributor.

Procedure:
1. Make sure the game is turned off/game unplugged. Locate and unplug the 5-pin power connector CN6 on core nodes 8 and 9.
2. Plug the female end of the Capacitor Kit into the 5-pin power connector CN6 on core nodes 8 and 9.
