SUBJ: Balrog LED Kit!

THE LORD OF THE RINGS

Balrog LED Module Installation SPI Kit Nr.: 502-5022-00

Announcement:

The initial production run of **Lord of the Rings™ Pinball**, used a #89 Bayonet bulb to light up the **Balrog (Motor & Gate) Asm.** Current production is using a LED (Red) Module. Although the LED (Red) Module is not as bright, *it is more reliable!*

Your LOTR Pinball may already have the LED Module installed in the Balrog, but your game manual may not have included the part numbers on Page 87 (the Blue Pages). You will be able to easily tell the differences of the Module & Socket upon inspection (view 6C & 3B in the graphic). For the **LED (Red) Module Bayonet 12.8v 20-25mA**, use SPI Part # **112-5023-02** and for the **2-Lug Laydown Bayonet Socket (Modified)**, use SPI Part # **077-5003-00-80**.

The **optional Balrog LED Kit** is now available (ask for SPI Part # **502-5022-00**). SPI is currently providing this kit at cost through your authorized distributor (listings in your Service Game Manual or on our website).

Use the **SINGLE COIL TEST (Q32)** to check your bulb operation. The replacement involves the removal of the old socket and bulb using the existing hardware (see the Installation Procedure for more information).

Please or eMail with any questions or comments at the below numbers or address.

Contents:
LED (Red) Module Bayonet 12.8v 20-25mA (112-5023-02), 2-Lug Laydown Bayonet Socket, Modified (077-5003-00-80), and Shrink-Wrap Tubing (605-5002-00, 2 pcs.).

Tools Required:
Phillips Screwdriver, 1/4" Nut Driver and Soldering Iron.

- Step 1:** Remove two Philips Head Screws (1A) and the Balrog Protector Bracket (1B).
- Step 2:** Remove two 1/4" Hex Head Screws (2A) and the Switch Bracket (2B).
- Step 3:** Remove one 1/4" Hex Head Screw (3A) and the Large Bayonet Socket with the #89 Bulb (3B).
- Step 4:** Unsolder the Orange (ORG) and the Black-Gray (BLK-GRY) wires from the lugs of the Lamp socket in Step 3.
- Step 5:** Place the enclosed Shrink-Wrap Tubing (5) on each wire.
- Step 6:** Solder the ORG wire to the outside lug (6A) and solder the BLK-GRY to center lug (6B) of the new enclosed LED Module (6C).
- Step 7:** Position and heat the Shrink-Wrap Tubing around the soldered wires and lugs (7).
- Step 8:** Place socket and LED into position inside the Balrog and ensure the bend in the mounting bracket is sufficient to keep the bulb from touching the sides of the cavity inside the Balrog (8).
- Step 9:** Reassemble in reverse order using the same securing hardware.
- Step 10:** In Portals™, access **GO TO DIAGNOSTICS MENU, GO TO COIL MENU, SINGLE COIL TEST** and advance to Q32 to test the newly installed LED (see page 18 of your The Lord of the Rings™ Service Game Manual for more details on testing).
