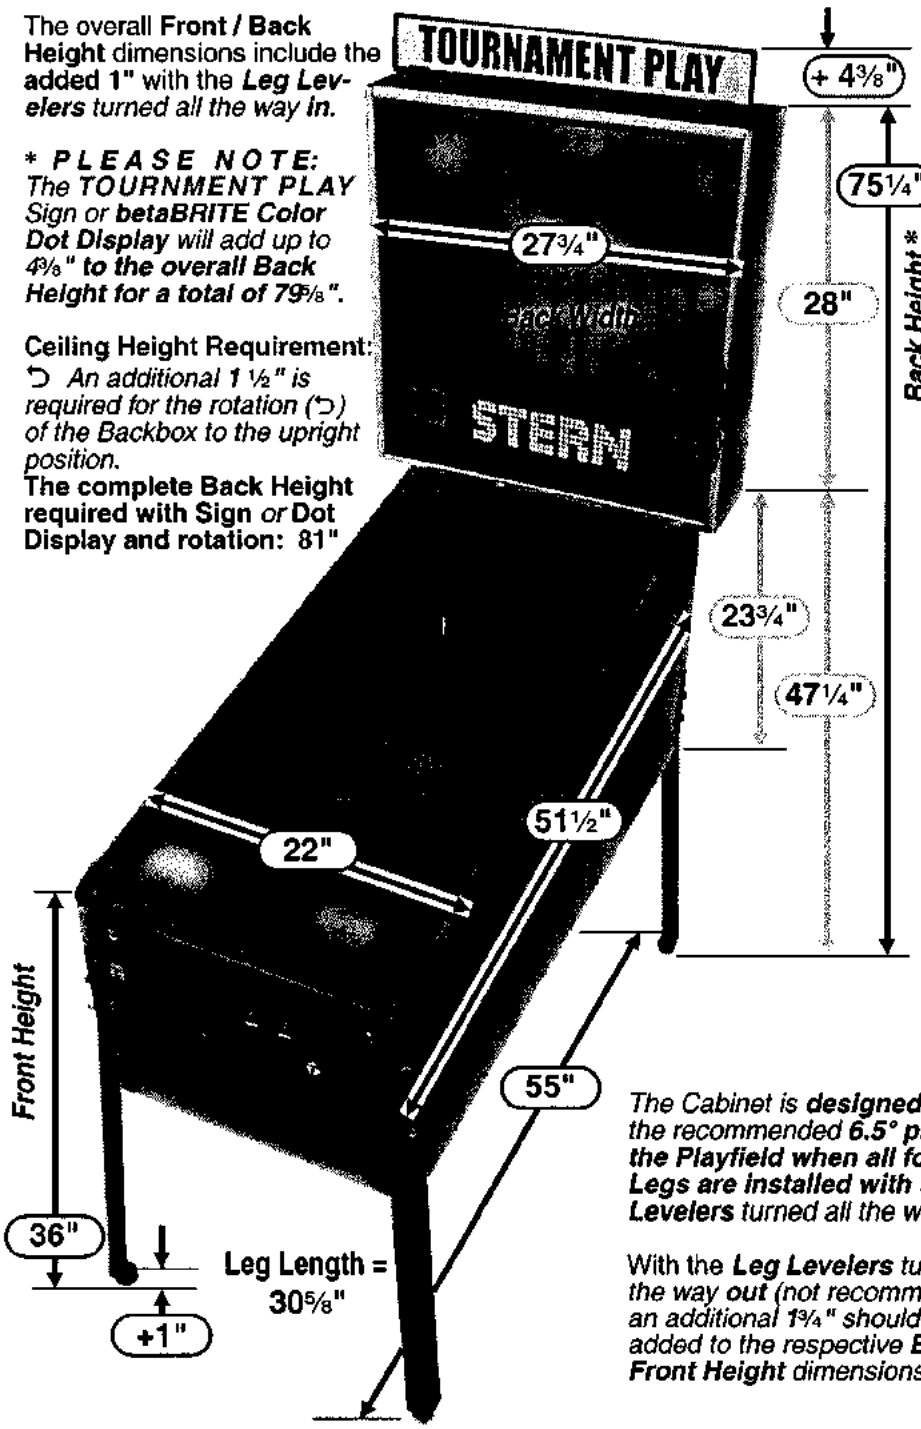
GAME DIMENSIONS

The overall **Front / Back Height** dimensions include the **added 1"** with the ***Leg Levelers*** *turned all the way* ***in.***

** PLEASE NOTE: The TOURNMENT PLAY Sign or* ***betaBRITE Color Dot Display*** *will add up to 4⅜" to the overall Back Height for a total of 79⅝".*

Ceiling Height Requirement:
↻ *An additional 1 ½" is required for the rotation (↻) of the Backbox to the upright position.*
The complete Back Height required with Sign *or* **Dot Display and rotation: 81"**



The Cabinet is ***designed*** *to give the recommended* ***6.5° pitch to the Playfield when all four (4) Legs are installed with the Leg Levelers*** *turned all the way* ***in.***

With the ***Leg Levelers*** *turned all the way* ***out*** *(not recommended), an additional 1¾" should be added to the respective* ***Back*** *or* ***Front Height*** *dimensions.*

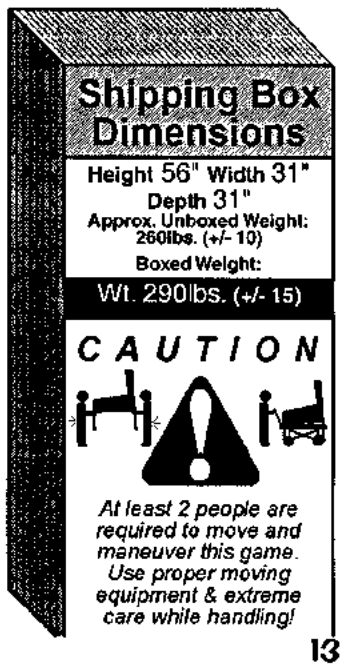
TRANSPORTATION

BEFORE TRANSPORTING

To reduce the possibility of damage, observe **ALL** precautions whenever transporting the game.

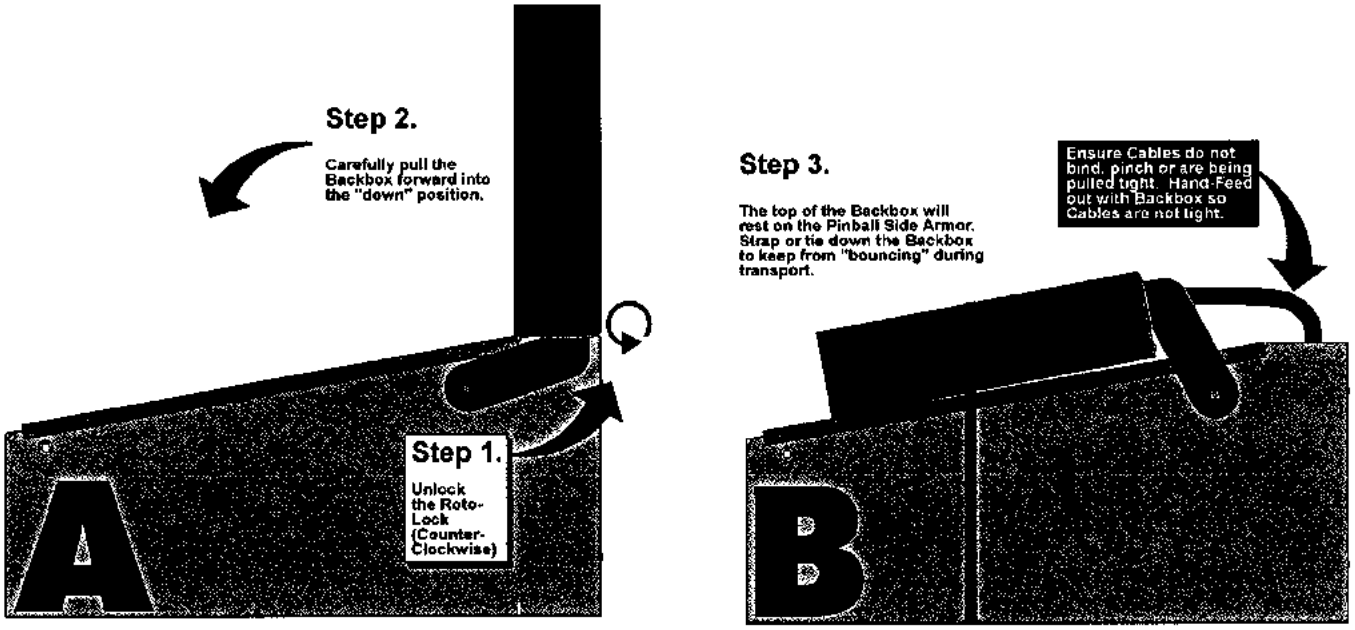
Read & follow *the next page on* ***How to Secure the Backbox for Transporting.*** *Remove the legs and secure the game within the transporting vehicle.*

SAVE AND RETAIN ALL PRINTED INFORMATION INSIDE THE CABINET !



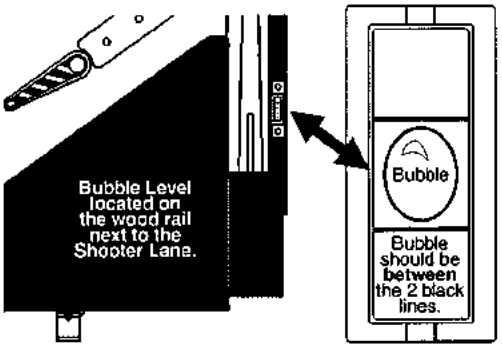
How to Secure the Backbox for Transporting

*For more Backbox details & part numbers, see the Pink Pages (**Parts Identification & Location, Backbox ...**).*



Leg Leveler Adjustment

Attach the four (4) Leg Assemblies to cabinet corners with the eight (8) leg bolts provided .

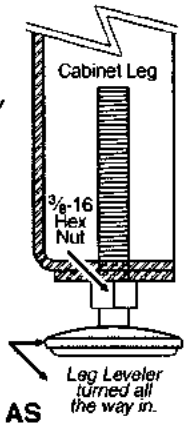


Start adjustment with the leg levelers *turned all the way in.*

View the *bubble* in the level provided on the right side wood rail.

Adjust the front or rear levelers as necessary to cause the bubble to float between the two (2) black lines.

Use a pinball to roll down the center of the playfield for side-to-side leveling.



YOUR PLAYFIELD PITCH IS NOW AT 6.5° AS REQUIRED FOR PROPER GAME PLAY!

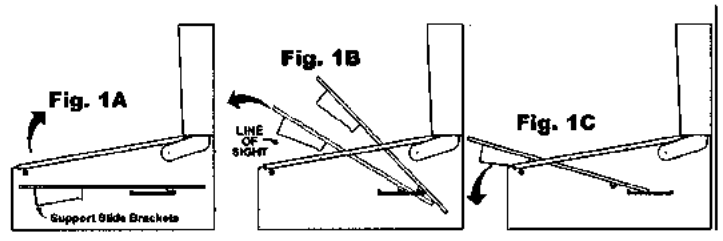
Note:** For custom adjustment greater than >6.5° can be achieved by turning out the rear leg leveler(s), however, **it is not recommended.

Easy Access Service System - 2 Positions

With the front molding & glass removed, carefully lift the playfield *(take care when using the Bottom Arch to hoist).*

Position 1

When lifted high enough, the ***Playfield Support Slide Brackets*** (**Fig. 1A**) can be seen and can clear the cabinet front (**Fig. 1B**). At this time, pull the playfield toward the front of the cabinet, checking that the mechanical components clear the cabinet front, then rest the playfield on the ***Playfield Support Slide Brackets*** at the front channel of cabinet (**Fig. 1C**);



Position 2

With the playfield at rest, hold the sides & pull toward the front of the cabinet *(approx. 6" to 8")*, until resistance is felt from ***Edge Slide Brackets*** stopping against the ***Slide & Pivot Support Brackets*** located on either side of the cabinet (**Fig. 2A**). At this time, swivel the playfield toward the Backbox, then rest on the top edge (**Fig. 2B & 2C**).

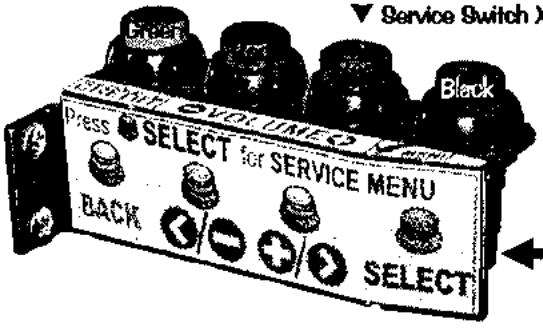
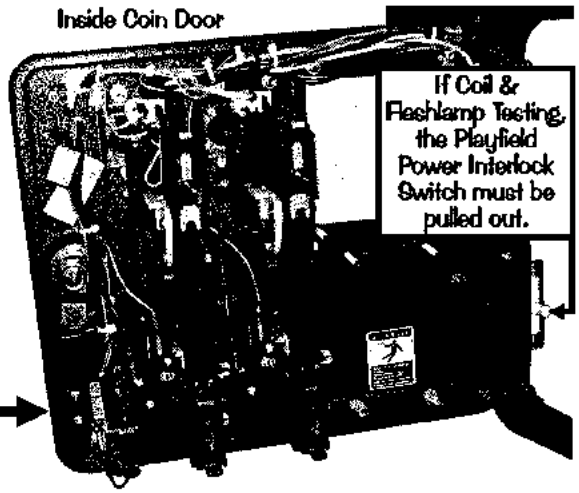
Service Switch X4 Set Access & Use

The **4-Button Service Switch Set** provides access for ***three (3) functions*** available for your use: **1: SERVICE CREDIT, 2: VOLUME [–] / [+]** and **3: SERVICE MENU.**

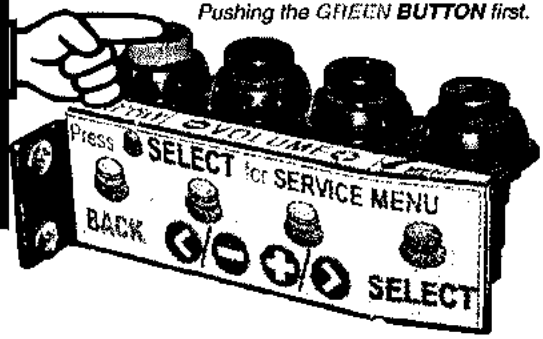
▼ Service Switch X4 Set ▼





To access any of these ***three (3) functions*** you must first open the **Coin Door** *(see pictorial above)* with the Game in the ***Attract Mode*** *(not already in any Function or Menu stated below) and then follow below.*

Pushing the GREEN ***BUTTON*** *first.*

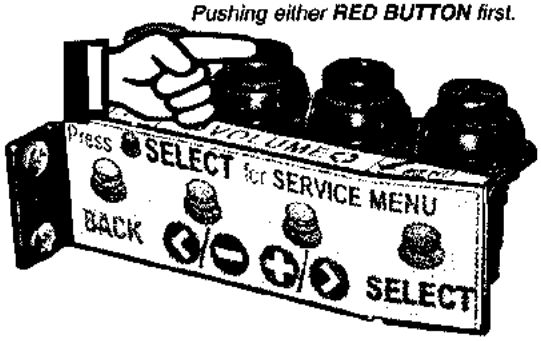


◀ Function 1: SERVICE CREDITS MENU

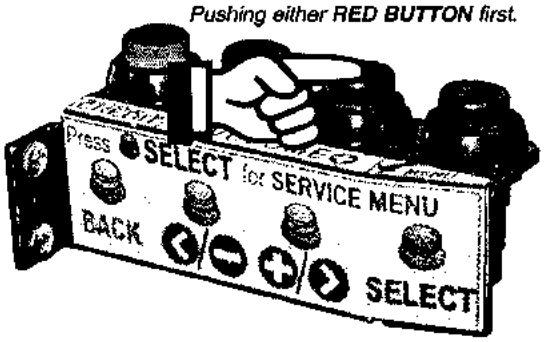
Pushing the **Green [SERVICE CREDIT] Button** first, adds a ***Service Credit*** per push *(will not affect your audits as "paid" credits).* This is useful for the technician to test games in regular play without affecting the game audits. Each depression adds **1 credit**; up to **50 credits** can be applied. **Standard Adjustment 23, Credit Limit,** determines this, however, it can be changed from 04-50; *for details see the Adjustments Section.*

Note: *Once your credits are added, this menu will* ***automatically exit*** *a few seconds after the last button depression or when the* **Green [BACK]** *or* **Black [SELECT] Button** *is pushed. This function is disabled if* ***Standard Adjustment 38, Free Play,*** *is set to* ***YES****. The Service Credits are limited to the Credit Limit in addition to any paid credits present in the game (e.g. If the Credit Limit is 30, with 8 paid credits present, only 22 Credits can be applied.).*

Pushing either ***RED BUTTON*** *first.*



Pushing either ***RED BUTTON*** *first.*

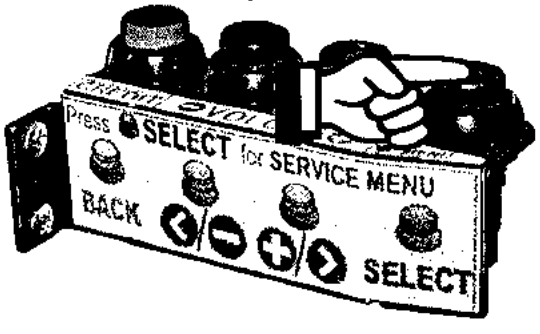


▲ Function 2: VOLUME MENU ▲

Pushing either of the **Red [VOLUME] Buttons** first, enters the ***VOLUME MENU.*** While in this Mode, to **DECREASE** the volume, hold down or depress the **1st Red [< / –] Button** until desired the volume is achieved; to **INCREASE** the volume, hold down or depress the **2nd Red [+ / >] Button** until the desired volume is achieved.

Note: *The volume can be set between* **0-63***; Once your adjustments are made, this menu will* ***automatically exit*** *a few seconds after the last button depression or when the* **Green [BACK]** *or* **Black [SELECT] Button** *is pushed.*

Pushing the ***BLACK BUTTON*** *first.*

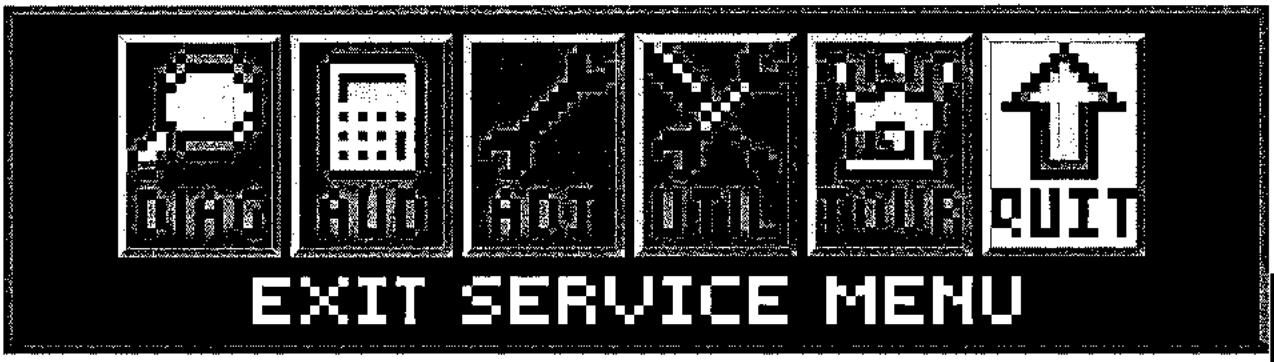


◀ Function 3: SERVICE MENU

Pushing the **Black [SELECT] Button** first, enters the ***SERVICE MENU.*** Once in, navigate through all menus by depressing the **Service Menu Buttons.** Use the **Red [< / –]** *or* **[+ / >] Buttons** to move LEFT / RIGHT, NEXT/PREVIOUS *(audits/adjustments) or* to INCREASE / DESCREASE an adjustment (setting). Use the **Black [SELECT] Button** to select a highlighed *Icon,* move to the next line of text *or* to answer "**OK**" where applicable. Use the **Green [BACK] Button** to exit *or* escape back.

Exit Service Menu

In the **MAIN MENU** and in all **SUB-MENUS** *(where the "QUIT" Icon is present)*, if the "QUIT" *Icon* is selected and *activated*, or the **Green [BACK] Button** is selected repeatedly *(depending on which sub-menu you're in...)*, the **SERVICE MENU Session** will be exited and returned to the ***Attract Mode.***



LOOK Turning the game on/off will start the *Power-Up Routine.* Upon **Power-Up**, the DISPLAY will indicate the COUNTRY, FILE VERSION and LANGUAGE(S) installed. LANGUAGE/COUNTRY: change via Dip Switch. LOOK

PROBLEM	SOLUTION
Will not enter the **SERVICE MENU** after depressing the **Black [SELECT] Button**.	• Check the Service Switches [GREEN, RED (x2) & **BLACK Buttons**] for loose connections or bad ground. • Check the associated wiring harness to/from the CPU/Sound Board, Connector **J13**. • Check CPU/Sound Board for possible failure.
All **Service Buttons [• • • • Buttons]** appear nonfunctional.	• Check the Service Switches wiring harness for poor or no connection and/or broken wires.
The **Green Button** in the Attract Mode will not enter the **SERVICE CREDITS MENU** to add Service Credits.	• Check to make sure the Game is not in "**Free Play.**" *If the game is set to Free Play, adding Service Credits is not required.* • Check the Service Switches wiring harness for poor or no connection and/or broken wires.
The **Display** "blanks out."	• Check the Dot Matrix Display for loose wiring harness for poor or no connection and/or broken wires. • Check **F1** (3/4A Fuse) on the Display Power Supply Board. *Refer to the Yellow Pages (**SCHEMATICS & TROUBLESHOOTING**).*
Icons *"scroll"* along continuously in the **MAIN MENU**.	• Check for a stuck switch on either of the **Red Buttons.**
The **Start** and **Flipper Buttons** do not select or activate *Icons* in the **SWITCH TEST MENU.**	• This is normal. These switches are deactivated, as they are a part of the Switch Test. *Refer to the Diagnostics Section (**GO TO DIAGNOSTICS MENU, Switch Test**).*
Can't move selection of *Icon* with the **Left** and/or **Right Flipper Buttons.**	• Check the **Flipper Buttons** for loose connections or bad Ground and refer to Section **5**, Chapter **2**, Playfield Wiring, #-Flipper Circuit Wiring Diagram. • This is normal ***only*** in ***Diagnostic's Switch & Active Switch Tests*** *(see previous Problem).*
Some *Icons* appear non-functional in the **MENU** or missing.	• Some functionality of the Service Menu may not have been completed during development. If exists, it should only be a non-critical function, such as the "**HELP**" *Icon*, which will explain the usage of icons. When completed, a software update will correct the problem. Software updates are announced via Service Bulletins (if critical) and on our website **http://www.sternpinball.com/GAME-code.shtml**; view the Game Code Library Message Board Marquee or click **Previous Messages** for past announcements.
In **COIL TEST MENU**, the coils and flashlamps ***do not*** fire after pressing the **Black [SELECT] Button.**	• Ensure the **POWER INTERLOCK SWITCH** ***is pulled out*** *(see the start of this Chapter).*

Pinball Service Menu Icon Tree Continued

Note: Press [SELECT] to install; Press [BACK] to cancel. After selection of any of the Install Icons, the request is installed and returns to the Install Menu. The last icon activated before exiting this menu will supercede any previous Icon selected in the group.

This page is intentionally blank.

To initiate, from the **MAIN MENU**, select the "DIAG" *Icon*. The **DIAGNOSTICS MENU** provides tests for switches, coils, flash lamps, lamps, sounds and dots in the Dot Matrix Display. Each feature may be tested manually or automatically after entering the **SERVICE MENU** *(see Service Menu Introduction Section).*
The **[CYCLING COIL TEST] / [FLASH LAMP TEST]** may be used for a quick verification of automatic test functions. The **[SWITCH TEST] / [SINGLE COIL TEST] / [SINGLE LAMP TEST] / [ALL LAMPS TEST] / [ROW LAMPS TEST] / [COLUMN LAMPS TEST] / [FLASH LAMP TEST]** may be used for troubleshooting.

All **DIAGNOSTICS MENU** *Icons* and there usages are explained throughout this chapter in the same order as seen in the Dot Matrix Display. ***NOTE:*** Depending on Game Type, Version, selections made, Dip Switch settings, location and/or areas, some *Icons* may appear non-functional *or* may not appear at all. Some *Icons* change depending on selections *(e.g. Selecting and activating the "STRT" Icon [Start Tournament] will be replaced with the "STOP" Icon [Stop Tournament]).* ***Icons** and/or **functions, order** and **operation are subject to change.***

In displays where changes can be made *or* to perform a function, use the **GREEN Button** to go **[BACK]**, exit *or* escape, the **RED Buttons** to [< / –] MOVE BACK / LEFT / DECREASE / [+ / >] MOVE FORWARD / RIGHT / INCREASE a value *or* setting, and the **BLACK Button** to **[SELECT]** next *or* as "OK / ENTER / ENERGIZE."

Important:** Upon **Power-Up** (Game CPU Reset) or opening the **Coin Door** watch the **Display** for any **Alerts.

This ***audible / visual alert display*** is shown when the **50V / 20V Power** is disabled *(by opening the Coin Door).* **PULL OUT THE INTERLOCK SWITCH *ONLY* WHILE IN THE SERVICE MENU FOR COIL OR SWITCH TESTING & BURN-IN WHEN THE COIN DOOR IS REQUIRED TO STAY OPEN FOR SERVICE BUTTON USE!** Pulling out the Power Interlock Switch or pressing the 'escape' **Green [BACK] Button** will remove the alert display. Initial display presentation is accompanied by 3 audible tones *(the bright display warning will go dim after approximately 30 seconds).*

This ***alert display*** is shown momentarily during **Game Mode** or **Power-Up** to alert the operator of a device malfunction *(device or mechanism doesn't energize or is energized repeatedly).* **OPERATOR ALERT!** works by monitoring any *switch activated device* that has the potential to trap a ball when disabled *(e.g. in the Shooter Lane, Scoop or Eject Holes, etc.).* This alert can also appear if a switch associated with a device *(e.g. Ball Trough, Auto Plunger, etc.)* is stuck closed *(caused by a switch jam or stuck ball)*; the game will activate the device a predetermined number of times and if the problem is still detected, this device *or* switch will be noted in **Switch Alerts** *(next page)* and/or **Technician Alerts.**

Upon entering the **SERVICE MENU**, if an asterisk " * " is displayed after the words "SERVICE MENU," the game has detected possible faulty devices, switches and/or missing pinballs. Press the either of the **Red Buttons** *(short-cut to the TECHNICIAN ALERTS MENU) or* continue into the **SERVICE MENU** *(press the **Black Button** again),* select the "DIAG" *Icon* and "TECH" *Icon* for the **Technician Alerts** information.

CAUTION! Remove all pinballs from the Ball Trough prior to lifting the playfield to it's full upright position for servicing. **PULL OUT** the **Power Interlock Switch** for operation. To eject pinballs, select the "DIAG" *Icon* from the **MAIN MENU** to enter the **DIAGNOSTICS MENU**. Select the "CLR" *Icon* to enter the **BALL TROUGH TEST MENU**. Press the **Black [SELECT] Button**. To return to the **DIAGNOSTICS MENU**, press the **Green [BACK] Button**. *This feature also useful to retrieve a pinball for game testing in **Switch** or **Coil Tests.***

Go To Switch Menu

To initiate, from the **DIAGNOSTICS MENU**, select the "SW" *Icon*. Switches are configured in an 4 X 16 Matrix of Rows [Switch Drives] and Columns [Sw. Returns] with up to **64** possible switches. Dedicated Switches are configured in a 2 X 16 Matrix of Rows [Dedicated Sw. Drives / Ground] and Column [Ded. Switch Returns] with up to **32** possible dedicated switches *(includes the 8 dip switch positions).* The **SWITCH TEST MENU** consists of three (3) parts: **Switch & Active Switch Tests** and **Switch Alerts** to test ***all*** switches.

Reminder: *The **Flipper & Start Buttons** (part of Switch Tests) are temporarily disabled as **Service Menu Navigation Buttons** during these test(s) so they can be tested and shown on-screen. Pressinng the **Green [BACK] Button** (Dedicated Switch **D-21**), Light Green-Black / Black (GND), will exit **Switch Test** or **Active Switch Test**.*

Switch Test

To initiate, from the **SWITCH MENU**, select the "TEST" *Icon*. Ensure the **Power Interlock Switch** is pulled out if testing with the Coin Door open and the activation of coils is required. Upon entering **Switch Test**, you will notice that some switches are already indicated as closed. In the examples, the 4-Ball Trough Switches **#18, #19, #20** & **#21** are shown closed *(pinballs at rest in the ball trough),* along with the Flipper E.O.S. Dedicated Switches **D-10** & **D-12** (End-of-Stroke Switches are 'normally closed'). If the game has more flippers with E.O.S. Dedicated Switches, CPU Dip Switch Setting *other than* 1-8 OFF or switches stuck closed, more dots will be indicated *(enter **Active Switch Test** to reveal the names).*

Upon entering Switch Test, you will notice that some switches are already indicated as 'closed'. ▼

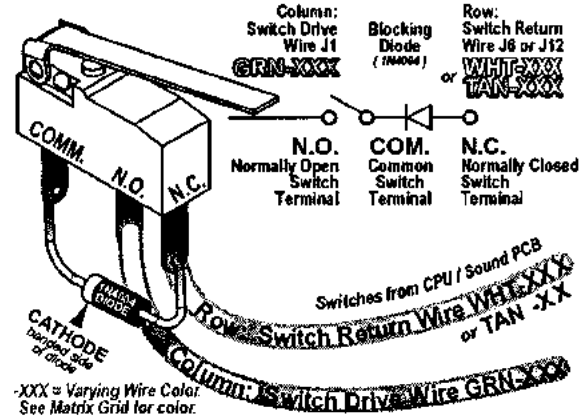
D-24 position is highlighted and accompanied by a short audible tone when pressed ▼

After pressing the switch *(to make it close)*, the display will indicate the last switch number. ▼

In **Switch Test**, close each switch and observe the display *(switch closure is accompanied by a short audible tone).* In the example, the **Black [SELECT] Button** Dedicated Switch **D-24** is pressed. The Dot Matrix Display will light up *(highlight)* the corresponding *dot* in the on-screen matrix, display the *switch name, switch number* and the *Switch Drive / Return wire colors.* When not closing a switch, the display indicates **NONE** and the last switch number closure. For the Switch Matrix Grid and Dedicated Switch Grid, see **Find-It-In-Front: Dr. Pinball, DR. 4** *or* escape out of this test and enter **Active Switch Test** *(described below)* to view the names of the switches closed. ***Note:*** *Pressinng the **Green [BACK] Button** (Ded. Switch **D-21**), Lt. Green-Black / Black (GND), will exit the **Switch Test**.*

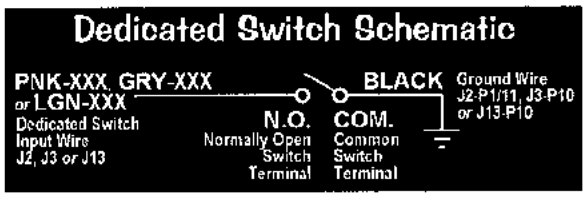
CAUTION! COIL MECHANISMS WHEN ACTIVATED HAVE FAST MOVING PARTS! While performing **Switch Test** with the Coin Door closed *or* open *(with the Power Interlock Switch is pulled out),* **DO NOT USE YOUR FINGER** to test switches which are associated with a coil mechanism such as a Vertical Up-Kicker *(hole with a switch),* Slingshots, Bumpers, etc..

Typical Switch Wiring & Schematic



Active Switch Test

To initiate, from the **SWITCH MENU**, select the "ACT" *Icon*. In **Active Switch Test**, if any switches are stuck closed *(or normally closed from the presence of pin-ball(s) as in the Ball Trough),* the display will flash the corresponding dot(s) in the on-screen matrix, display the *name* and the *Switch Drive / Return wire colors.* If more than one switch is closed, the switch information will change with each switch. This cycle continues until all switches are cleared *or* until **Active Switch Test** is exited. In the example, the **Black [SELECT] Button** Dedicated Switch **D-24** is pressed and held down. The display will cycle and flash each dot, naming each switch which is closed. To determine the *switch number,* compare the highlighted dot to the same position in the Switch Matrix Grid at the beginning of this manual.



...D-24 is held down. The display will cycle and flash each dot, naming each switch ... closed. ▼

Switch Alerts

To initiate, from the **SWITCH MENU**, select the "ALRT" *Icon*. In **Switch Alerts Menu**, possible inoperable switches are marked with an "X" (OUT OF SERVICE). Mark switches **IN** *or* **OUT OF SERVICE** by pressing the **Black Button** while the intended switch is highlighted and change with either of the **Red Buttons**. Game-Specific Tests

To initiate, from the **DIAGNOSTICS MENU**, select the "GAME" *Icon.* Ensure the **Power Interlock Switch** is pulled out when testing with the Coin Door open. *This Menu is provided to allow the technician a simple method of testing game specific coils and/or switches, if required. If used, select the Icon (and Sub-Menu Icons, if any) and follow on-screen prompts.*

Ball Trough Test

To initiate, from the **DIAGNOSTICS MENU**, select the "CLR" *Icon.* Ensure the **Power Interlock Switch** is pulled out if testing with the Coin Door open. This Menu is provided to allow the technician a simple method of removing the balls from the trough and also, to test functionality of the trough, ensuring proper trough operation. Upon entering **Ball Trough Test**, you will notice that four switches are already indicated as closed. In the example, the 4-Ball Trough Switches **#18, #19, #20** & **#21** are shown closed *(pinballs at rest in the ball trough).* To return to the **DIAGNOSTICS MENU**, press the **Green [BACK] Button.**

Press the **Black [SELECT] Button** to eject the ball in the first position Switch **#21** (VUK OPTO Trough #1 (R)). Simultaneously, the Dot Matrix Display and the playfield will eject the ball to the Trough Up-Kicker, eject from the Trough Up-Kicker into the Shooter Lane, momentarily closing Switch *#23 (Shooter Lane),* and is ejected onto the playfield where the technician can easily retrieve the pinball or allow the ball(s) to re-enter the trough to continue **Ball Trough Test.** The Dot Matrix Display indicates Switch **#18** (4-Ball Trough #4 (L)) as open as the remaining three (3) pinballs shift over one (1) position to the right. If the technician allows the ejected pinball to reenter the ball trough, the Dot Matrix Display will indicate Switch **#18** as closed. ***REMINDER:*** *Switch #22 is the stacking OPTO switch; If more than five (5) pinballs are used, the additional switches will be noted. Typically, four (4) pinballs are used and required for proper operation; if this amounts differs, it will be noted on the front page of this Service Game Manual.*

CAUTION! *Continuous use off the above test may overheat the Trough Up-Kicker Coil.*

Technician Alerts

To initiate, from the **DIAGNOSTICS MENU**, select the "TECH" *Icon.* This Menu is provided to show any switch *or* solenoid problems and/or missing pinballs. If upon entering the **SERVICE MENU** the display indicated an asterisk (*) and "USE -/+ TO VIEW TECH. ALERTS", alerts are present.

After pressing either **Red [< / –] / [+ / >] Button** *or* selecting this *Icon* in the **DIAGNOSTICS MENU**, the display will indicate the alert(s). If there are 2 alerts present, the display will indicate (1/2) with the 1st alert on the display. Press the **Red [+ / >] Button** to view the second alert (2/2). The second number in the parenthesis ( ) after the slash (/) indicates how many alerts are present. Refer to the start of this chapter *regarding "Upon entering the* **SERVICE MENU** *"* indication and to **SWITCH ALERTS.** To return to the **DIAGNOSTICS MENU**, press the **Green [BACK] Button.** ***Note:*** *While in this menu, an option may be present to jump (short-cut) to the appropriate Testing Menu (e.g. Coil Test, Switch Test, Game Specific Test or Ticket Dispenser Test, if installed).*

NOTE ON SWITCH DETECTION : During game play, activation of switches are continuously monitored. For a switch to be determined as inoperable *or* **OUT OF SERVICE**, up to twenty games *or* so must be played for a switch to be automatically marked as **OUT OF SERVICE**. In programming, if a switch is determined to be faulty, game play is compensated. Switches noted as **OUT OF SERVICE** are determined to be stuck closed *or* open depending on switch usage. Free up the switch actuator, adjust *or* replace, if necessary. Performing a valid switch closure will put the switch back "IN SERVICE."

Determination of switch usage can be checked in **Audits** *(review the Audits Section).* Find the associated Audit with the switch in question and check usage; compare the numbers to commonly used switches. After any switch is checked and repaired *or* replaced, it's suggested to test the switch in the **Switch Test** *or* **Single Coil Test** *(reviewed earlier in this section)* where the associated coil to the switch can be tested as well. After correcting the problem, the switch will marked "IN SERVICE" and the switch is again monitored as specified above. *Only you can determine if a switch marked OUT OF SERVICE is actually inoperable, or if it is just not getting actuated during game play.*

NOTE ON PINBALL DETECTION : While in **TECHNICIAN ALERTS MENU**, if the following is displayed, the game has detected one (1) *or* more pinball(s) missing and has compensated for the lost pinball(s) to provide normal game play.

Technician Alerts continued on the next page.

Ticket Dispenser Test

To initiate, from the **DIAGNOSTICS MENU**, select the "TIX" *Icon*. This Menu *(Icon) will only appear* if **Standard Adjustment 56, Ticket Dispenser**, is set to **YES** (Default = **NO***). ***Note:** Some games shipped from the factory with a unique Dip Switch Setting will default to **YES**). To view and/or change your setting, see Adjustments Section (**GO TO ADJUSTMENTS MENU**). Please remember, if you install an optional Ticket Dispenser, and your default setting is "NO," you will have to reset it back to "YES" if a **Factory Reset** is performed.*

After selecting this *Icon*, the ***Ticket Dispenser Test*** will start. With the Ticket Dispenser properly installed, manually feed your tickets into the dispenser. The dispenser will activate and pull in the first ticket. Press the **Black [SELECT] Button** (which energizes Coil #35, Aux 3: Switched Ground) to advance a ticket. Feeding your Tickets into the dispenser works because Coil #33, Aux 1: Ticket Advance (Enable) is always 'energized'. With a Ticket Meter installed, as one Ticket Passes through the Ticket Dispenser, one 'click' is fired to the Meter (Coil #34, Aux 2: Ticket Meter) for each ticket passing through. Dedicated Switch **D-19, Ticket Notch**, will also be indicated on-screen *(in combination with a audible sound)* as "closing" as the notch between the tickets passes through. In this test you can clear ticket jams and check and/or clear tickets in Escrow, if necessary. To return to the **DIAGNOSTICS MENU**, press the **Green [BACK] Button**.

To initiate, from the **MAIN MENU**, select the "AUD" *Icon.* The **AUDITS MENU** provides 99* Audits for accounting purposes and for evaluation of *Game Programming.* The Audits are divided into 4 groups: • **Earnings Audits [#1 – #13],** • **Standard Audits [#1 – #59],** • **Feature Audits (Programming Use Only) [#1 – #+]** and • Tournament Audits [#1 – #14], "T AUD" *Icon* provided as an alternate access to Tournament Audits *(*if data is available).* For more information on the **TOURNAMENT MENU,** *review the Tournament Section (**GO TO TOURNAMENT MENU**). Try the **"DUMP AUDITS TO USB"** feature to create a text file of your audits. Don't forget to set the DATE & TIME in the **UTILITIES MENU**. See the Utilities Section (**GO TO UTILITIES MENU**), for more information.*

Audits which are named **Proprietary** are also for ***Future Expansion*** or ***Programming.*** Game code may get upgraded during production; compare all Audits in the Dot Matrix Display with the manual and make any corrections, as necessary. Audits are subject to change *(with or without notice).*

All **AUDITS MENU** *Icons* and there usages are explained throughout this chapter in the same order as seen in the Dot Matrix Display. ***NOTE:*** Depending on Game Type, Version, selections made, Dip Switch settings, location and/or areas, some *Icons* may appear non-functional *or* may not appear at all. ***Icons** and/or **functions**, **order** and **operation are subject to change.***

In displays where changes can be made *or* to perform a function, use the **GREEN Button** to go **[BACK],** exit *or* escape, the **RED Buttons** to [< / –] MOVE BACK / LEFT / [+ / >] MOVE FORWARD / RIGHT to view the next audit in the group, and the **BLACK Button** to **[SELECT]** the sub-menus.

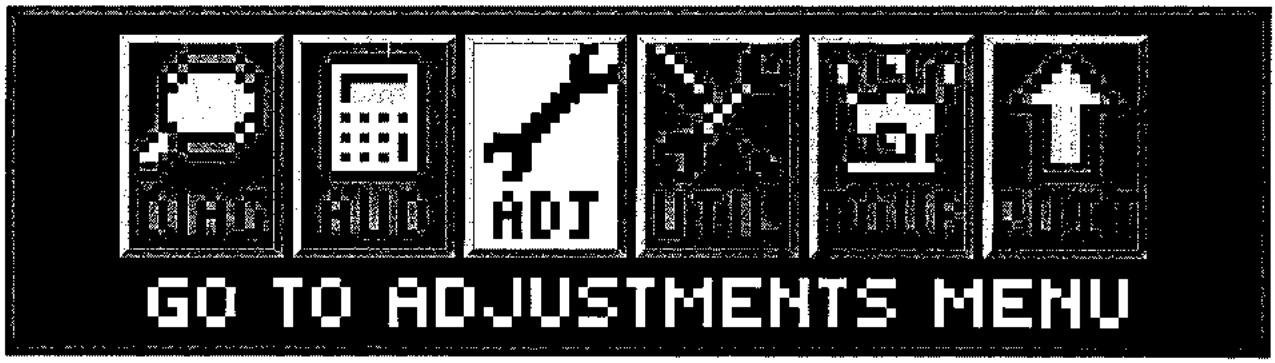
Step 3 Remove the Memory Stick and insert into your PC *or* Mac to save the file *(which can then be copied, printed or emailed).* The audits are numbered sequentially ***without*** a number restart between the three types of audits *(Earnings, Standard and Feature).*

Note: *The "DUMP" Icon can also be accessed in the* ***USB MENU*** *via the* ***UTILITIES MENU*** *(see the Utilities Section (****GO TO USB MENU****) for details).*



To initiate, from the **MAIN MENU**, select the "ADJ" *Icon.* The **ADJUSTMENTS MENU** provides 64+/– Adjustments to vary Game Functions to customize for your particular needs. The Adjustments are divided into 2 groups: • **Standard Adjustments [#1 – #63]** and • **Feature Adjustments (Programming Use Only) [#1 – #+].** *For **quick** and **easy customization** of **Game Play Difficulty** or **Game Play Type** or how to **RESET ONLY** the Adjustments, review the Utilities Section (**GO TO INSTALLS MENU**). **Shortcut: Enter Custom Message** (Standard Adj. **41**) and **Set Custom Pricing** (via Standard Adjustment **18**, Game Pricing) can be quickly accessed via the **UTILITIES MENU**. See the Utilities Section (**GO TO UTILITIES MENU**), for more information.*

Adjustments which are named **Proprietary** are also for ***Future Expansion*** or ***Programming***. Game code may get upgraded during production; compare all Adjustments in the Dot Matrix Display with the manual and make any corrections, as necessary. Adjustments are subject to change *(with or without notice).*

All **ADJUSTMENTS MENU** *Icons* and there usages are explained throughout this chapter in the same order as seen in the Dot Matrix Display. ***NOTE:*** Depending on Game Type, Version, selections made, Dip Switch settings, location and/or areas, some *Adjustments* may appear non-functional *or* may not appear at all. ***Adjustments** and/or **functions, order** and **operation are subject to change. If in doubt use the Factory Default Settings.***

In displays where changes can be made *or* to perform a function, use the **GREEN Button** to go [**BACK**], exit *or* escape, the **RED Buttons** to [< / –] SELECT PREVIOUS [+ / >] SELECT NEXT when the adjustment name *or* setting is flashing and the **BLACK Button** to [**SELECT**] toggle between the ADJUSTMENT and SETTING.

Standard Adjustments [#1 – #63]

To initiate, from the **ADJUSTMENTS MENU**, select the "S.P.I." *Icon.* The Dot Matrix Display will indicate the *adjustment number (in this group), adjust. name, adjust. setting* and *comment line.* The current adjustment will remain on the display until the next adjustment is viewed or when this sub-menu is exited.

#1 **REPLAY TYPE:** Set to **AUTO, NONE, FIXED** *or* **DYNAMIC**. Factory Default = **AUTO**. **AUTO** & **DYNAMIC** are based on the **Replay Percentage** *(Standard Adjustment 2).* • Select **FIXED** to give the player a **Replay Award** *(Standard Adjustment 3)* as the **Replay Levels** *(Standard Adjustments **7-10**)* are reached. The **Replay Level(s)** *(Standard Adjustments **7-10**)* will not adjust up or down. • Select **AUTO** to give the player a **Replay Award** *(Standard Adjustment 3)* as the **Auto Replay Start** *(Standard Adjustment 5)* score level is reached. This *score threshold* will automatically adjust up or down based on the **Replay Percentage** chosen *(Standard Adjustment 2).* The game periodically adjusts based upon the Player Base Skill Level. • Select **DYNAMIC** to give the player a **Replay Award** *(Standard Adjustment 3)* as the **Dynamic Replay Start** (Standard Adjustment **6**) score level is reached. This *score threshold* will go down every game based on the **Replay Percentage** *(Standard Adjustment 2)* selected. • Select **NONE** to turn off Standard Adjustments **2-11**.

#2 **REPLAY PERCENTAGE:** Set between **1% – 50%**. Factory Default = **10%**. Adjustable only if **AUTO** *or* **DYNAMIC** is installed in Replay Type, Standard Adjustment **1**. For [**DYNAMIC**] example, if the *score threshold* is 50,000,00 and the **Replay Percentage** selected is **10%**, every game a player does not reach the *score threshold*, the score to reach will drop by 5,000,000 (10% of 50M). This will continue every game until the *threshold score* is reached. Thus, if the score then drops to 15,000,000 after 7 games and is then achieved, the **Replay Award** *(Standard Adjustment 3)* is given. The original *score threshold* is added to 15,000,000 and is now 65,000,000. It will then take the same player 10 games to reach 15,000,000. *This adjustment is shown only if **AUTO** or **DYNAMIC** is installed in **Replay Type** (Standard Adjustment 1).*

Standard Adjustments 3-18 continued on the next page.

Standard Adjustments continued.

#3 **REPLAY AWARD:** Set to **CREDIT, TICKET*, TOKEN*** *or* **EXTRA BALL.** Factory Default = **CREDIT.** Set the type of award to be given to the player when the appropriate Replay Score threshold or level is acheived. If awarding a ***CREDIT, TICKET*** *or* ***TOKEN*** is prohibited in your area, select **EXTRA BALL.** *This adjustment is not shown if* ***NONE*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****).*

Note: If* ***TICKET* *or* ***TOKEN*** *is selected, the game will require an optional Ticket or Token Dispenser and then* ***Q24 Option*** *(Standard Adj. 55) must be changed accordingly.*

#4 **REPLAY LEVELS:** Set between **1 – 4** for the number of Replay Levels to be active. Factory Default = **1.** *This adjustment is not shown if* ***NONE*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****).*

#5 **AUTO REPLAY START:** Set between **5,000,000 – 150,000,000** *(increments of 1,000,000)* for the Auto Replay Start threshold. Factory Default = **__,000,000.** *This adjustment is shown only if* ***AUTO*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****).*

#6 **DYNAMIC REPLAY START:** Set between **5,000,000 – 150,000,000** *(increments of 1,000,000)* for the Dynamic Replay Start threshold. Factory Default = **__,000,000.** *This adjustment is shown only if* ***DYNAMIC*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****).*

#7 **REPLAY LEVEL #1:** Set between **5,000,000 – 150,000,000** *(increments of 1,000,000).* Factory Default = **__,000,000.** Set the first *or* only Replay Level. *This adjustment is shown only if* ***FIXED*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****).*

#8 **REPLAY LEVEL #2:** Set between **5,000,000 – 150,000,000** *(increments of 1,000,000).* Factory Default = **__,000,000.** Set the second Replay Level. *This adjustment is shown only if* ***FIXED*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****) and* ***2*** *is intalled in* ***Replay Levels*** *(Standard Adjustment* ***4****).*

#9 **REPLAY LEVEL #3:** Set between **5,000,000 – 150,000,000** *(increments of 1,000,000).* Factory Default = **__,000,000.** Set the third Replay Level. *This adjustment is shown only if* ***FIXED*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****) and* ***3*** *is intalled in* ***Replay Levels*** *(Standard Adjustment* ***4****).*

#10 **REPLAY LEVEL #4:** Set between **5,000,000 – 150,000,000** *(increments of 1,000,000).* Factory Default = **__,000,000.** Set the fourth Replay Level. *This adjustment is shown only if* ***FIXED*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****) and* ***4*** *is intalled in* ***Replay Levels*** *(Standard Adjustment* ***4****).*

#11 **REPLAY BOOST:** Set to **YES** *or* **NO.** Factory Default = **YES.** When set to **YES**, while **FIXED** or **AUTO** maintains the Replay Levels, Replay Boost works as follows: If the Replay Level is 7,000,000 *(regardless of the Replay Percentage)*, and the Player scores 20M, and receives the Replay Award, the next game the Current Replay Level is added to this base. Thus the next game, the Replay Level is 14,000,000. The Player agains scores 20M. The next game the Player will need to achieve 21,000,000 to earn the Replay Award. If the Player does not achieve 21,000,000, the next game reverts back to the original 7,000,000 or the new adjusted level maintained by the Fixed or Autopercentaging Feature. *This adjustment is shown only if* ***AUTO*** *or* ***FIXED*** *is installed in* ***Replay Type*** *(Standard Adjustment* ***1****).*

#12 **SPECIAL LIMIT:** Set between **1 – 5, UNLIMITED** *or* **NO SPECIALS.** Factory Default = **1.** Set the maximum number of *Specials* that may be accumulated per game.

#13 **SPECIAL PERCENTAGE:** Set between **1% – 50%.** Factory Default = **10%.** This adjustment allows the operator to adjust how frequently the ***Special Feature*** is made available to the player. *This adjustment is not shown if* ***NO SPECIALS*** *is installed in* ***Special Limit*** *(Standard Adjustment* ***12****).*

#14 **SPECIAL AWARD:** Set to **CREDIT, TICKET*, TOKEN*, POINTS** *or* **EXTRA BALL.** Factory Default = **CREDIT.** Select **EX. BALL** or **POINTS** if awarding a ***CREDIT*** or ***TICKET / TOKEN*** is prohibited in your area. *This adjustment is not shown if* ***NO SPECIALS*** *is installed in* ***Special Limit*** *(Standard Adjustment* ***12****).*

Note: If* ***TICKET* *or* ***TOKEN*** *is selected, the game will require an optional Ticket or Token Dispenser and then* ***Q24 Option*** *(Standard Adj. 55) must be changed accordingly.*

#15 **FREE GAME LIMIT:** Set between **1 – 9, UNLIMITED** *or* **NO FREE GAMES.** Factory Default = **5.** Set the maximum number of *Free Games* that may be accumulated per game.

#16 **EXTRA BALL LIMIT:** Set between **1 – 9, UNLIMITED** *or* **NO EXTRA BALLS.** Factory Default = 5. Set the number of *Extra Balls* that may be accumulated per game.

#17 **EXTRA BALL PERCENTAGE:** Set between **1% – 50%.** Factory Default = **25%.** This adjustment allows the operator to adjust how frequently the ***Extra Ball Feature*** is made available to the player. *This adjustment is not shown if* ***NO EXTRA BALLS*** *is installed in* ***Extra Ball Limit*** *(Standard Adjustment* ***16****).*

#18 **GAME PRICING:** There are two (2) methods available for *Coin Switch Programming*: **Standard** & **Custom.** Set between **AUSTRALIA 1 – UK 6** *or* **CUSTOM.** Factory Default = **USA 10.** *Shortcut:* ***Set Custom Pricing*** *and instructions, review the Utilities Section,* ***Set Custom Pricing.*** The appropriate Dip Switch Setting (Dip Sw. 1-8 location CPU/Sound PCB SW1) in relationship to the Pricing Scheme selected is important *(view the tables on the following pages for more information).*

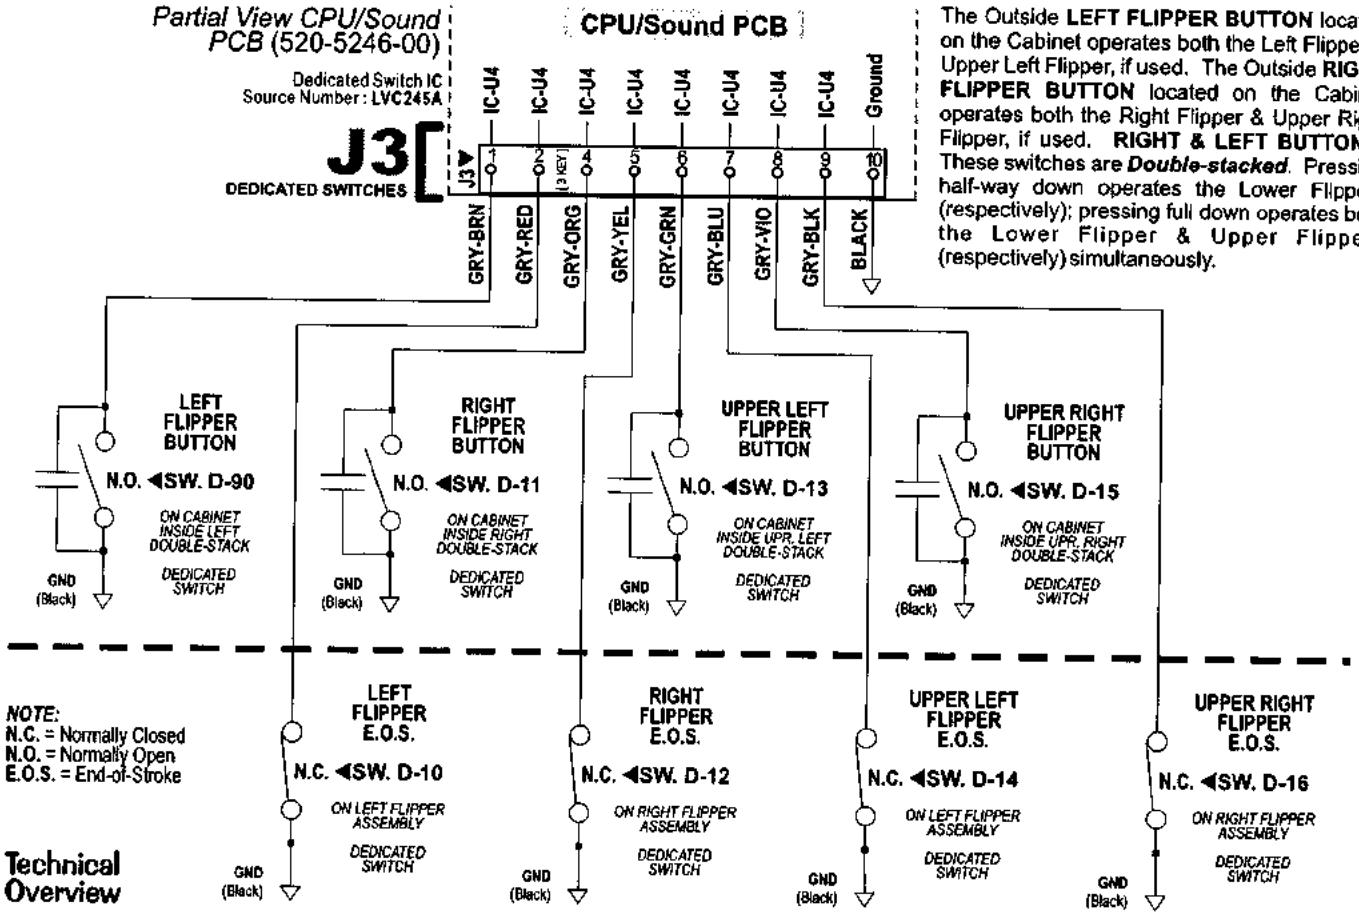
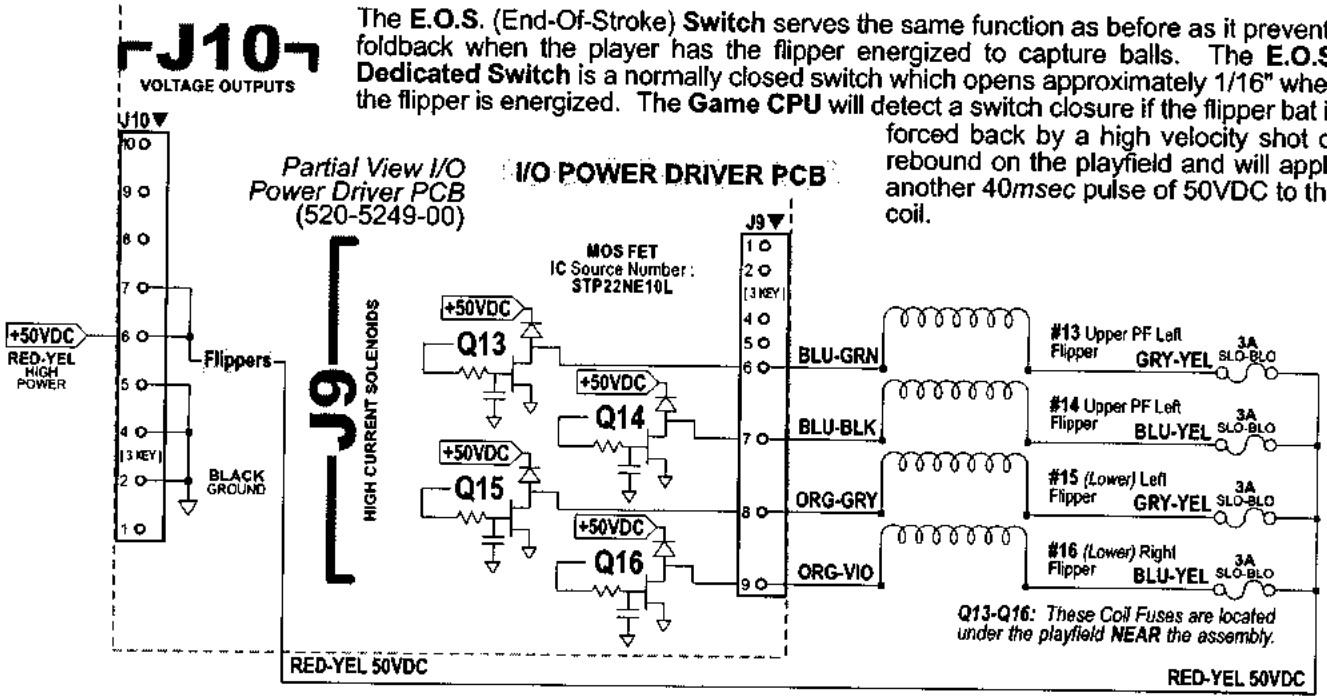
#-Flipper Circuit Wiring Diagram



The Outside **LEFT FLIPPER BUTTON** located on the Cabinet operates both the Left Flipper & Upper Left Flipper, if used. The Outside **RIGHT FLIPPER BUTTON** located on the Cabinet operates both the Right Flipper & Upper Right Flipper, if used. **RIGHT & LEFT BUTTONS:** These switches are ***Double-stacked***. Pressing half-way down operates the Lower Flippers (respectively); pressing full down operates both the Lower Flipper & Upper Flippers (respectively) simultaneously.

Technical Overview

Our ***Flipper System*** uses one supply voltage (+50VDC) for both ***kick*** & ***hold***. Once the **Game CPU** detects a Flipper Cabinet Switch closure *(during game play)* it applies a 40*msec* pulse to the gate of the Flipper Drive Transistor (STP22NE10L). If it continues to detect a Flipper Cabinet Switch closure *(the player holding the button in)* it will continue to pulse the flipper drive transistor 1*msec* every 12*msecs* for the duration of the hold cycle.



The **E.O.S.** (End-Of-Stroke) **Switch** serves the same function as before as it prevents foldback when the player has the flipper energized to capture balls. The **E.O.S. Dedicated Switch** is a normally closed switch which opens approximately 1/16" when the flipper is energized. The **Game CPU** will detect a switch closure if the flipper bat is forced back by a high velocity shot or rebound on the playfield and will apply another 40*msec* pulse of 50VDC to the coil.

Typical Under-Playfield Fuses are rated:
3A 250v Slo-Blo
Do Not Over-Fuse

NOTe:
Coil Diodes (1N4004) are integrated on the I/O Power Driver PCB. See Coils Detailed Wiring Diagram for actual number of flippers used on this game.

Playfield Terminal Strips

Explanation:
All Switches, Lamps & Coils require diodes. Coil diodes are located on the I/O Power Driver PCB *(in Backbox)*. Some diodes from switches or lamps are moved onto Terminal Strips (***located under the playfield***). This is done where space constraints or excessive vibrations are present. *The Switch & Lamp Matrix Grids also note which Switch or Lamp has a diode on a Terminal Strip, noted by **DOTS** (**D**iode **O**n **T**erminal **S**trip).*

Note: *Some wires 'appear' to be doubled on the lugs. The switches and lamps are in a series, so you may see 1 or 2 wires depending where the switch or lamp is in the string.*

Typical Switch Wiring & Schematic

Typical Lamp Wiring & Schematic
